Stud History

Coryule Merino flock No 5061 Poll flock No 1508

The Coryule Merino stud was established in 2009 with their Poll Merino stud starting in 2012 and registered in 2014, with the transfer of Coryule Merino ewes, the purchases of Borambil Merino ewes, 20 poll embryos and two poll rams from Alfoxton. We have also been buying cast for age Nerstane stud ewes for the past few years.

Nerstane 231 was purchased in 2015 and used in our ET and AI program as well as backing up the AI over the past few years. We have some very interesting sons in our on property sale as well others in our 2020 show and sale team.

The poll stud now consists of 200 ewes, while we also run about 300 Merino stud ewes. The genetics is based mainly on Alfoxton, Nerstane and Roseville Park bloodlines.

In 2005, Coryule Pastoral Company began their artificial insemination program on their way to establishing the stud.

As well last season we introduced some Roseville park 100038 semen into the merino's and in the poll's a Rogara, and two Borambil poll with them all having a number of sons in our sale.

The Merinos

Nerstane 120231

(N120231) He is a nourished, productive 66's wool which also has excellent staple length and thickness. Exceptional bone and spring of rib.

He is the sire of a lot of our top priced rams we have sold the last few years and has many ewes in our stud.

Roseville Park 122779

(RP122779) Sired by RP 14

He is a fine testing ram with great fleece weight figures. This ram was used to continue our Roseville family and is crossing well with our Nestane blood ewes.

Coryule 160078

(160078) A great young sire heavy cutter with white rich wool and was used over our Nerstane family ewes mainly He is by RP122779.

Borambil Jimmy

(B130634) Jimmy is a grandson of Nerstane 910 and has very good wool quality.

Sheep Genetics data available on the day

The Polls

Rogara Canberra

(R143375) he has well-nourished wool, bred in a high rainfall environments (750 mm rainfall). Selected to breed stylish crimped wools. He carries the double poll gene.

Borambil 187

(BP150187) He is a dual purpose type with very well marked wool with great lustre, thickness and staple structure. He is a Double P. By PB 54

Borambil Poll 10

(BP150010) He is by PB 54 we picked him up as lamb from Borambil he has crimped water proof wool on a very good frame. He carries double poll gene.

Poll Boonoke

(PB150388 & 161828)

These two sire's were used to continue the Poll Boonoke line in our polls. They both have water proof type of wools.

Wool test terminology summary:

Micron	Test of mean fibre diameter
SD	Standard deviation Less than 5% is good
CV	Co-efficient of variation Less than 20% is good
CF	Comfort Factor is the % of fibres less than 30 microns
SF	Spinning fineness

Averages for the 2018 drop rams

August wool test and body weight 25/9/2019

Micron	SD	CV	CF	Body weight
18.6	3.2	17.3	99.3	82 kilo

Rebate

A rebate of five percent will be offered to outside agents introducing and accompanying buyers at our on property sale. and has very good wool quality.

The team at Coryule would like to thank all clients for their support and attendance at our Sale. We want and expect that our clients will be happy and satisfied with the rams they purchase.

A classing service and ram selection is available on request. If we can be any assistance please phone or email:

Craig 0417 373 900 craig@coryule.com

A sincere thanks to our selling agents for their support and promotion.

~ The team at  **coryulemerinos**
